Excerpt: .B and C will be the points where the normals to the two surfaces, at their common point A, pierce the horizontal plane; and, consequently, BC, the trace of the normal plane which passes through them. The perpendicular AD to this trace BC is then the tangent required. It may appear, at first, difficult to conceive the horizontal trace of a plane, which does not, in fact, differ from the plane of projections; but the doubt will be easily dispelled, by imagining the operation to be executed upon a point at an evanescent distance from the real point A; a supposition which will convince the mind, without altering the result. This case occurs frequently in practice. We will here conclude the considerations on the intersections of surfaces, which belong to the elementary part of this treatise; and resume the determination of tangent planes, This...

Reviews

An incredibly amazing ebook with perfect and lucid answers. It is written in basic terms and never difficult to understand. It has been written in an exceptionally basic way and it is only right after I finished reading this ebook in which it in fact modified me, affected the way I really believe.
